### INSTRUCTION FOR INSTALLATION OF 600W Portable PV power station for Balcony

Before installation, please read the instructions for installation and operation of each of the elements in the set!

1. Install the Micro-inverter in a suitable place on your balcony
2. Mount the PV panels on the balcony so that no shadow falls on them
3. Connect three panels in series (follow the diagram from the instruction)
4. Connect extension cords to each string as needed
5. Connect the extension cord to the micro-inverter
6. Place the end plug on one side of the micro-inverter
7. Connect the cable with a Shuko plug
8. Insert the plug into a suitable outlet for this

**Please check the relevant legislation for connecting the device to your home network before installing the system!**
